Shipping charges will be added to all items above (excluding sample chips). UPS from Chicago, Illinois – US & Canada only. Sample chips can ship USPS flat rate \$1.25

GROUT COLORS

Brick: A warm red-brown color that compliments rosewood, cherry, etc.

Coffee: A neutral medium brown color compliments most woods

Sand: A light neutral buff-brown color compliments bamboo, pine, etc.

COVERAGE

Coverage varies according to wood thickness and grout joint size and depth.

To calculate coverage measure the grout joint width, times grout joint depth, times all grout joint lengths in inches (WxDxL) this will give you the volume of grout you need in cubic inches.

Take this cubic inch number and multiply by 0.004329. This will give you volume in US Gallons. You can also find calculators from cubic inches to US Gallons online with a simple internet search.

We recommend adding 10% to 20% overage to your order to account for real world variation.
